

REMARKS

STATUS OF CLAIMS

Claims 1-4 were in the original Patent and are presented herein. Claim 2 has been amended herein while Claims 1, 3 and 4 remain the same.

SUPPORT FOR ALL CLAIM CHANGES

Claim 2 has been amended to recite that the Z phase pulse signal is not generated on rotation of a real electric motor in the master section and to eliminate the wording from the claim because the electric motor M_m and the encoder P_m are not provided in the master section in Claim 2. The point of claim 2 is to use a means for electrically generating pulses equivalent to output of the encoder P_m in the master section. Namely, in this case, the electric motor M_m and the encoder P_m are not provided in the master section as shown in Fig. 1. Support for this amendment is in the Specification at Column 7, lines 28-43.

Should any fees be necessary in order to maintain this Application in pending condition, appropriate requests are hereby made and authorization is given to debit Account #02-2275.

Respectfully submitted,

MUSERLIAN, LUCAS AND MERCANTI, LLP
